

# COLLEGE TRANSITIONS:

## 2020 HB5 College Prep Course Trainings

### **Creating a Bridge to Post Secondary Education**

HB 5 requires school districts to partner with at least one institution of higher education to develop and provide college preparatory courses (CPC) in Mathematics and ELA for 12th grade students who have yet to demonstrate college readiness. Students who successfully pass the course(s) receive a college readiness waiver that exempts them from the corresponding TSI assessment(s), and allows them to enter into college-credit bearing courses.

As stipulated in the HB 5 CPC Memorandum of Understanding, signed in 2014 by Region One superintendents and presidents of the local institutions of higher education, English and Math HB 5 CPC teachers are required to attend continuing professional development offerings to instruct these courses. The required training includes an initial July training or make up training, and follow up training throughout the academic year.

Additionally, students who successfully complete the College Prep Course in English or Math can earn advanced course credit for the foundation plan in the respective content area. Each secondary campus must follow their district protocol to offer this opportunity to students.

Administrators and counselors are welcomed to attend the introductory sessions to support implementation of the courses.
