Watch Out!

- *Spending too much time alone
- *Watching or listening to the news constantly
- *Monitor the use of electronics: cell phone, tablets, computers and TV
- *Careful on the information you follow on social media
- *Limit your alcohol intake
- *Thoughts of wanting to sleep and not wake up
- *Experiencing inexplicable fears
- *Feeling that you can't keep going

Try These Techniques

- Take frequent breaks from social media – avoid information overload.
- Make the time to exercise – choose your activity, just get moving!
- Connect with people who bring comfort – talking to trusted people is helpful.
- Schedule mental breaks – drawing, crossword puzzles, word searches, reading, etc.
- Establish a bedtime routine...free of electronics. Getting 6-8 hrs. of sleep is essential.
- Follow a healthy diet – foods with high sugar or processed food can worsen symptoms.
- Meditate or pray during the day. Nurture your spirituality the best way you know how.
- Keep a journal to write your feelings and thoughts.
- Practice mindfulness – enjoy the present moment use your senses to connect.
- Engage in a constructive hobby: photography, building models, crafts, etc.
- Go outside for a walk to connect with nature.
